## NOTE

A blank entry on the column "New Part Number" means that the part was not used by Meccano either in sets or as spares since the introduction of the New Parts Numbering System, in 2001, and therefore it was not allocated a new Part Number.

If the part is used again, a new Part Number, of the type Axxx, will be attributed to it.

The parts that have a new Part Number but were used in no sets from 2001 are noted as "spares".

The Old Part Numbers listed here to which no New Part Numbers were allocated correspond to all the Parts included in the last Spare Parts List (1977) to be published before the introduction of the New Numbering System, to which all the Parts used in sets introduced from 1997 to 2001 were added.

Produced by **Oscar Felgueiras** (Mar 2015)
